

## A CONTAINER FOR CONTAINING SEMICONDUCTOR WAFERS

### ABSTRACT OF THE DISCLOSURE

A container for containing semiconductor wafers. A preferred embodiment of the  
5 invention provides a container for containing semiconductor wafers that includes a first  
container body including a base and a wall connected to the base, a first wafer support  
plate located inside the first container body; and at least one semiconductor wafer between  
the base of the first container body and the first wafer support plate, wherein the  
semiconductor wafer is stabilized between the first wafer support plate and the first  
10 container body.
